

ISO FAR organized a scientific workshop on

Research Needs for the Development of Organic Agriculture

in 21th Organic World Congress, Nanhua University, Taiwan

The organic sector needs to move forward to meet the challenges of its different aspects. Therefore, the development of Organic Agriculture depends on convincing answers to a range of serious challenges. Research may help to resolve the problems. In this workshop which dated on Dec. 2nd, 2024 and moderated by Prof. M. Reza Ardakani (ISO FAR Board Member), the lecturers discussed on important challenges in organic food production from a multi-perspective view and tried to outline corresponding research solutions. **The workshop has discussed issues below and designed a concept for OA & SCIENCE relationship.**

- How to reconcile crop productivity and nature protection in Organic Agriculture (by: Prof. M. Reza Ardakani- Iran)
- Potential and limits of organic agriculture in the tropics (by: Prof. Victor Olowe- Nigeria)
- Challenges of animal health of organic livestock (by: Dr. Mahesh Chander- India)
- Organic market development in Indonesia (by: Prof. Wahyudi David- Indonesia)
- Unanswered questions in Organic crop production (by: Prof. Danniell Neuhoff-Germany)
