

Organic Agriculture

April 2021 Newsletter

Welcome to the first edition of the *Organic Agriculture* newsletter for 2021 – we hope you are all keeping safe and well.

In this newsletter, we would like to share with you some journal highlights, developments and news from *Organic Agriculture*.

Organic Agriculture has a new Editor-in-Chief

As you may be aware, Gerold Rahmann stepped down from his tenure as Editor-in-Chief of *Organic Agriculture* at the end of 2020. Gerold greatly helped to steer the growth of the journal, which enabled *Organic Agriculture* to achieve its most successful year in 2020 in terms of submissions and publications. As the current President of ISOFAR, we are pleased that Gerold will continue to work closely with us. Thank you very much Gerold for your services to *Organic Agriculture*.

We are delighted to announce that **Professor Raffaele Zanoli** has been appointed as the new Editor-in-Chief for *Organic Agriculture*. Raffaele is a Professor of Agricultural Economics & Marketing at the Polytechnic University of Marche, Italy and also serves on the Board of ISOFAR. We are excited to see what the future holds for *Organic Agriculture* and are confident that it will continue to develop and grow with Raffaele's expertise at the helm.

Share your articles through SharedIt

Did you know that you can easily share and distribute articles published by *Organic Agriculture* through the Springer Nature SharedIt content-sharing initiative?

As an Editorial Board Member of this journal, you should have free electronic access* to all content published in *Organic Agriculture*. You can therefore make use of the SharedIt function and share articles published in the journal with your networks and peers, who may not necessarily have a subscription, and therefore access to this journal.

Share this article

Anyone you share the following link with will be able to read this content:

[Get shareable link](#)

Provided by the Springer Nature SharedIt content-sharing initiative

To obtain a sharing link for an article, please click on the 'About this article' option when viewing an article on SpringerLink, scroll down and click on the 'Get shareable link' box (see above). This shareable link can then be posted anywhere, including on social media channels and on scholarly collaborative networks. Please note that the sharing of articles via SharedIt must be for non-commercial, personal use only. For more information on the SharedIt content-sharing initiative, please click [here](#).

* Please get in touch if you do not have free access to the journal so that we can resolve this for you

Wish to publish open access?

We are committed in helping to accelerate the uptake of open access (OA) publishing and open research techniques.

Many funders and institutions now cover OA publishing costs for affiliated researchers, as part of OA Transformative Agreements with Springer Nature. Therefore if your institution has a Transformative Agreement with Springer, you may publish your article OA free of charge in *Organic Agriculture*. Such agreements include participating institutions in the following countries:

Austria, Finland, Hungary, Italy, Manipal, Netherlands, Norway, Poland, Projekt DEAL Germany, Qatar, Sweden, Switzerland, UK & University of California

[Learn more here](#). Please note that it is the Corresponding Author's designated country of residence that determines whether a manuscript is eligible for an OA agreement – therefore even if you do not reside in any of the countries listed above, but collaborate and co-author a manuscript with an author from a participating institution, your article can still publish OA.

If you have any questions about any of the content presented in this newsletter, please do not hesitate to [get in touch](#).
Thank you all for your continued support of *Organic Agriculture*.

Take care and stay safe,

Kerrí Brown, *Organic Agriculture* Publishing Editor

On behalf of **Raffaele Zanolli**, *Organic Agriculture* Editor-in-Chief
